DOWNLOAD

93 and I have a flashed ATI Radeo HD 4870 video card that is supposed to work on a PC but its flashed so it works on a mac.. And we're glad to see that it is sold in kit form You will need the February 2009 ATI drivers but those should be available to all users in the next Apple system update.. The Radeon HD 4870 is a welcome CTO option for the 'early 2009' Nehalem Mac Pro.

But it seems no one was able to do it How come suddenly everyone and their brother is now able to flash the PC 4870? Anyone know what the differences between the two are, that would prevent the 3870 from being flashed successfully? Sep 11, 2009 I have a Mac Pro 1.. Aug 6, 2010 Apparently, Apple is seeding updated Graphics drivers Can any of our GPU gurus hazard a guess at whether these will benefit those of us with flashed cards, or will they more likely brick them, or do we just not know until we test them?I don't want to get my hopes up for improvements that might never happen! Oct 8, 2009 So I have an Early 2009 Octocore 2.

But yesterday i wanted to plug a second 23' ACD in and woundered that its not working.. I know its not officially supported but the issue im running into is that the operating system cannot recognize the full resolution the HP LP3065 30 inch display is capable of.. I am looking at getting one from bruinmacs and was looking for feedback from others that may have bought one and whether there have been any problems.. Can i flash my card with another ROM so that i can use two monitors? In a german forum there are some people who has the same card and for them it works with 2 monitors. [Screenshot Tool For Mac](#)

Similar Messages: ADVERTISEMENT Aug 19, 2009 I have bought a flashed 4870 for my 1st Gen Mac Pro and it works fine.. 1 and I've been successfully running a flashed XFX ATi 4870 card for a month or so.. Both screens were connected to an Apple ATi 2600 XT and nothing was connected to the 4870.. Anyone else run into this issue? Heres the link btw to where this guy shows how to flash the card.. Yesterday evening I left my computer in sleep mode, when I came back it appeared to be awake with only one of the two screens working and everything frozen. [Maha Mrityunjay Mantra Songspk](#)

The display can run up to 2560x1600 on any other system but not with my ten thousand dollar machine.. The windows side can display at the full resolution but Snow Leopard can only run 1280x800 and it makes the OS look like a pile of dog **** on sunday.. Flashing 4870 to work in MacPro March 14th 2009 Posted to Apple, ATI, Leopard If you dont like minidisplay port or dont want to pay 3 times more for a card from apple, here is directions for how to get 4870 card working in macpro.. 1024 Mb Ati Radeon 4870 Review1024 Mb Ati Radeon 4870 ReviewMac Pro:: ATI 4870 1GB Flashed To Work On Mac Pro? Sep 30, 2009 I am looking at putting one of these cards in my first gen Mac Pro and was wondering if anyone has had any problems with compatibility issues etc.. [URL] Feb 22, 2010 guys would a flashed 4870 from this tutorial [URL] Mar 30, 2009 Ever since the 3870 came out last year, I've been waiting to see if anyone was able to dump the ROM from the Mac version and flash a PC version with it.. I held down the power button and restarted, the fans on the graphics cards ramp up and then down as usual and the computer makes the startup dong noise. b0d43de27c [Vlc Download For Mac Air](#)
